Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	2/16/2022	2/14/2022	Central Platte Holdings	Platte	Open Burning	DS		

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
February 16, 2022 and March 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48539 **Concern Info** Central Platte County Fire Protection District reports responding to someone burning items in a field. There was no burn permit for this activity and the items they are burning are things like carpet, lumber, and other items.

Comments Central Platte Holdings failed to properly handle solid waste. Solid waste was improperly deposited on the ground and was subsequently burned. A joint air and solid waste report with a Letter of Warning will be issued.

KCRO	2/16/2022	2/14/2022	Central Platte Holdings	Platte City Platte	Open Dumps	KB
------	-----------	-----------	-------------------------	-----------------------	------------	----

Concern No. 48540 **Concern Info** Central Platte County Fire Protection District reports responding to someone burning items in a field. There was no burn permit for this activity and the items they are burning are things like carpet, lumber, and other items.

Comments LOW being sent for open burning and improper disposal of waste

KCRO	2/16/2022	2/15/2022	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	CK
------	-----------	-----------	----------------	-----------------------	-----------------------------	----

Concern No. 48541 **Concern Info** AA Quarry is operating during a red flag wind warning day per the concerned party causing dust to leave the property. Dust reported to be miles in all directions from the operating site.

Comments Particulate matter was not observed leaving the property. There was some track out, which the facility was advised to address.

KCRO	2/17/2022	2/17/2022	Sleep Easy Chimney Service and Repair	Kansas City Platte	Open Burning	MC

Concerns Investigated Between
February 16, 2022 and March 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48625 **Concern Info** It is my understanding that this company burns trash and related job materials on their site as their way of disposal. Is this violation: I don't know. That's for the EPA to decide. Just reporting what I heard from someone who knows. Answered No to this still occurring' as I don't know one way or the other.

Comments ?This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City Kansas City Health Department's Air Quality Program.

KCRO	2/17/2022	2/17/2022	Unknwn	Ray	Asbestos Open Burning	CK		
------	-----------	-----------	--------	-----	--------------------------	----	--	--

Concern No. 48626 **Concern Info** Old 3 story building being torn down inside city limits of Orrick Mo on Taylor Street or renovated full of leads, asbestos and burning disregarded material in county on the owners rental property on Reynolds Rd and using, using scissor lift without proper tie off no precautions of tearing off hazardous materials

Comments Although the building used to be a public high school, it was converted into a four dwelling unit apartment building prior to the formation of EPA's asbestos regulations. Therefore, the building qualifies for the residential exemption.

Some demolition waste was transported to Gowing's farm and burned. This is a violation of 10 CSR 10-6.045, Open Burning Requirements. The contractor has submitted a satisfactory response for the open burning violation; therefore, the violation has been downgraded to an Unsatisfactory Findings. All remaining regulated demolition waste must be properly disposed of at a permitted landfill.

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
February 16, 2022 and March 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48620 **Concern Info** Caller states the body shop has odors and does not use a paint booth. Stated they paint all of the time.

Comments There is no body shop at 34839 Highway 10 in Excelsior Springs. It is possible this concern was meant to be for the Stl Kandee Kustom bodyshop owned by James Yokum and located at 4520 NE Birmingham Road, Kansas City, MO.

A search of Kansas City's online systems showed that Kansas City Zoning inspected 4520 NE Birmingham on December 7, 2021: "Inspected site of a commercial business in an M3-5 zoned district for a complaint of a body shop operating at the site. On investigation found an excavation business. No evidence of a body shop operating at the site. No zoning violations found. Closing the case."

KCRO	2/25/2022	2/25/2022	Paul Whitlow	Clinton Henry	Asbestos	JS
------	-----------	-----------	--------------	------------------	----------	----

Concern No. 48775 **Concern Info** The APCP Asbestos Unit received a call that mentioned a building collapse in the city of Clinton. An internet search found a news article about a partial collapse of a building on February 10, 2022. There was a concern that the city officials and building owners were not aware of the asbestos and demolition notification requirements.

Comments The asbestos requirements have been clarified with the Clinton Building Inspector, who was already familiar with the demolition requirements. The owner of the partially collapsed buildings was informed of the asbestos requirements.

KCRO	3/1/2022	2/28/2022	Jeremy Mertz	Clinton Henry	Particulates	RH
------	----------	-----------	--------------	------------------	--------------	----

Concern No. 48770 **Concern Info** Spray painting of campers and vehicles in open air and open shop No use of paint booth

Comments Show Me RV will provide information on types and amounts of regulated VOC's that are used and will arrange for a CAV that encompasses water pollution, hazardous waste, and air emissions. An email was sent on 3/15/22 to Mr. Mertz requesting more information about what type and quantity of paint and other potential air sources are on-site.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV	
KCRO	3/8/2022	3/3/2022	Jesse Horning	Oak Grove Jackson	Open Burning	CK			
Concern No. 48774		Concern Info Jesse Horning is operating a business repairing cars from his house. He is burning the trash from his business. Most recently burned yesterday, March 2. The smoke was black and there was an odor of burning plastic. The Jackson County Sheriff was at the property 2-3 weeks ago and the RP was told to stop burning. Jackson County Codes Enforcement issue a letter to him to remove vehicles about 2 weeks ago. He burns about every 2-3 days. He had stockpiled the last 2-3 weeks and had a big fire yesterday that lasted for hours.							
Comments At the time of this investigation, I could not confirm that Jesse Horning was burning any type of prohibited items listed in 10 CSR 10-6.045 Open Burning Requirements. Information was provided on what was allowed and prohibited. Horning indicated he understood the requirements and would properly dispose of non-household waste. Horning was advised that the Department may have to return to his property if further concerns are received.									
KCRO	3/14/2022	3/8/2022	Dan Green	Lexington Lafayette	Open Burning Other	JS			
Concern No. 48778		Concern Info We have lived in our property for 18 months. Since approximately 12 months ago, our neighbor regularly burns waste, including rubber and plastics. He purchase used items, and items from storage units, and burns what he cannot re-sell rather than properly disposing of the items. Last week alone, this occurred four days in a row. I'm concerned for my family's health at this point. I do feel like they would retaliate against us if they knew we complained if you could keep that confidential. I do have a couple video and pictures as evidence also. All our surrounding neighbors I'm sure would corroborate the same.							
Comments No violations were observed during the investigation. A letter with a copy of the open burning regulation will be sent to Dan and Crystal Green.									
KCRO	3/14/2022	3/9/2022	Four Seasons Mobile Home Park	Warrensburg Johnson	Open Burning	CK

Concerns Investigated Between
February 16, 2022 and March 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48779 **Concern Info** Burning of Mobile home scraps and skirting .. wooden compressed lumber scraps .. Shingles and carpet remnants .. Tires and plastics and pallets

Comments Open burning of prohibited items was observed. Also, two mobile homes were demolished with no certified asbestos inspection or a demolition notification submitted to the department. The site was found to be in violation of Missouri's open burning and asbestos regulations.

KCRO	3/10/2022	3/9/2022	Countryside Estates, LLP	Osborn Dekalb	Open Burning	MC
------	-----------	----------	--------------------------	------------------	--------------	----

Concern No. 48780 **Concern Info** Apartment Owners are having a tenant burn materials from renovated apartments onsite.

Comments Failed to comply with Missouri Air Conservation regulation 10 CSR 10-6.045, Open Burning Requirements. This regulation prohibits the disposal of petroleum-based materials, asbestos-containing materials, trade waste, construction or demolition waste, salvage operation waste, and durable goods by open burning. Furthermore, this regulation prohibits the open burning of household waste on or from properties with five or more residential units.

Countryside Estates has 20 residential units. During the investigation, I observed a burn pile containing construction / demolition materials, metal, plastic, and cardboard.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48789 **Concern Info** I am writing in regards to a property in rural Andrew County MO. that has became a major nuisance over the years. The address is 19273 COUNTY ROAD 300, in Andrew County MO. The owner of the property over the years has turned the property into basically a junk yard. In addition he has a small pond on the property. He allows people to come to his property and dump junk, burn casing off of wires and burn other trash and junk. They do most of this burning at the top of the pond. Then whenever there is a heavy rain or flood, the rain water washes all of the remnants of this junk out over the pond and across the neighbors pasture and eventually into a creek which I believe feeds into the Platte River. In addition all the oil and other by products from these junk vehicles and trash bleach into the ground and again I am sure make their way to a waterway. One of the people that come to the property dumps and stores tires there and on occasion I have seen the heavy black smoke that is evident of these junk tires being burned. Neighbors have watched this property go from bad to worse over the years. Is there anything that can be done to hold this owner accountable for the damage being done? Thank you in advance for your response.

Comments

NERO	2/16/2022	2/10/2022	David Whitehead	Williamsburg Callaway	Open Burning	SB
------	-----------	-----------	-----------------	--------------------------	--------------	----

Concern No. 48575 **Concern Info**

The report states that David Whitehead is "bringing in stuff and burning it in the middle of the night. How's the owner not going to fix this issue? It started up a week ago. I'm sending a letter to AG today. I'm not going away. I'm a dog with a bone when things are just wrong." Also, "They took burn barrels to the back of property to burn in middle of the night toxic debris from old trailers and RV's. I know this. My property sits below his. I take my dog out at 3:00 a.m. and can't breath the air its not just wood in those barrels. He's been evicted he keeps coming back."

Comments On-site investigation conducted. No violation found at the time of the investigation. A letter is being sent to provide guidance on burning of untreated wood pallets.

NERO	3/14/2022	3/10/2022	City of Hamilton	Hamilton Caldwell	Open Burning	RD		

Concern No. 48710 **Concern Info** The City of Hamilton Missouri has several sewer manhole lids with a lot of holes in them! There is also a manhole on North Ewing Street that with heavy rain fall it blows off and allows A lot of sewer into the stream that is really close by! Also just to the north east of that man hole there is a service that has 2 holes where the sewer just blows out of the pipes have buckets on them. There's also a burn pile south of the city's water barn that has had multiple couches and beds and tires burned in. There is also a lagoon at the end of that road that goes to burn pile that I've seen overflowing into a near by creek. I also picked up a snow removal process paper from city hall and they are wanting to dump piles of snow off 13 hwy into the city's drinking water reservoir! You know how much oil/gas/diesel/antifreeze/salt/transmission fluid is scraped up in that snow??

Comments No violations were found at the time of the investigation.

NERO	3/18/2022	3/11/2022	Coast to Coast Demolition	Bethany Daviess	Asbestos	SB

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 48604 **Concern Info** SP:367
We have an ongoing problem with a resident at 518 Bella Vista Dr. the resident is burning rubber and plastic, wire and other materials at all times of the day and night. we think he may be trying to hide evidence of illegal activities. This morning he burned a large couch which put off eyewatering fumes over a large area of the neighborhood.

Comments I arrived at the address of the RP around 12:45PM. The house at this address sits on a curve in the road. The house has a fenced in backyard that you cannot see over. The entire backyard is secluded behind this fence. From the road, I saw no signs of smoke, nor any odors of smoke. The recent rain would have put out any fire and made it hard to detect anything. I walked up to the house and noticed a woman in the garage. I made my presence known, introduced myself, and explained why I was there. I gave this woman my business card and asked if there was a Mr. or Mrs. Ken Brown home. The woman said that neither of them were at the house, but that this was their home and property. She also mentioned that she just stayed at this house. The woman refused to give her name and access to the property any further than us just talking in the garage. I asked the woman if she was aware of any open burning going on at this address and she said that she hadn't. I asked the woman if there was a good way of getting ahold of either Ken or Kim Brown. The woman gave me Kim Brown's cell phone number. The woman was uncertain of when either Ken or Kim Brown would return home. I asked the woman if I could leave some publications/fact sheets on open burning with her and asked that she relay them to Ken or Kim Brown when they return home. The woman agreed to pass the information along. I told the woman that I would try to get ahold of Kim Brown on her cell phone. Before I left, I asked if there were any questions that I could answer for the woman and she replied with no.

As I returned back to my vehicle, I tried to call Kim Brown's cell phone number which is (573) 579-8207. According to the operator, this was not a working phone number. I looked at the initial concern report and the CP had given a phone number. I then tried to call that number which was (573) 576-0035. This number seemed to be a working number, but nobody answered and there was no voicemail box set up to leave a message to. I then called the CP's phone number to try and inform him that I had investigated this concern and where I stood on it. The CP did not answer, but he did have a voicemail box so I left him a message. As of today, February 25, 2022, I still have not been able to get ahold of Ken or Kim Brown and have yet to hear from the CP either.

The publications I provided the woman at the RP's address with was as follows:
Facts on Open Burning Under Missouri Regulations - PUB2047
10 Code of State Regulations 10-6.045 Open Burning Requirements

SERO		2/16/2022			Fugitive Particulate Matter		TR	

Concern No. 48726 Concern Info

From the CP:

I'm sending some photos of this nearby business who continues to sand blast items he puts in his shop to paint. This business is south of our neighborhood. The tiny particles pollute our air and settles on our vehicles, etc. Our town apparently doesn't consider this a danger because after this was reported we were told there wasn't an ordinance against anything like this. That was it. The building does not belong to Richard Posey who owns this business. I would appreciate it if anything can be done about this. I'm sure he doesn't follow the safety guidelines for painting either.

I know you can tell who is contacting you I'd prefer not being mentioned as the complainant. His contact # 573-421-3966.

Comments

SERO	2/17/2022	Fugitive Particulate Matter	JD
------	-----------	-----------------------------	----

Concern No. 48727	Concern Info	Beelman Trucking has started storing a substance called Code-L A possible waste product from Mississippi Lime. Code-L is similar to Quicklime. Beelman is storing it in a large building. When they blow it into the building dust comes out the top of the building and settles on the surrounding community. This has caused slick conditions on the nearby highway, and coated homes and property. The caller has heard that they plan to build a new bigger Code-L storage building. More information on Code-L can be found at Beelman.com/Code-L-quicklime.

Concerns Investigated Between

February 16, 2022 and March 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 49198 **Concern Info** SP:389
CP states the RP is releasing too much sulfur dioxide into the air. CP states it is killing their trees, making their eyes burn, and they also have to wear a mask to go outside. CP states RP typically releases the majority of it at night but that they do have pictures where it looks like fog. CP states they are approx 1/4 mile from RP. CP would also like the investigator assigned to this concern to give them a call.

Comments I began this investigation by requesting records of sulfur dioxide (SO₂) from Jonathan Kennedy, CHMM and Environmental & Regulatory Affairs Manager with Mississippi Lime Company on February 23, 2022. The facility has a permit limit (see air Operating Permit OP2013-035A page 35) of 2,000 tons of SO₂ per year. These records may be kept per Attachment R or a similar sheet (such as a in a similar spreadsheet). Records for the last six months as submitted by Jonathan Kennedy suggested that the facility was in compliance with the 2,000 tons per year limit for SO₂. Mr. Kennedy discussed with me that he carefully tracks the SO₂ emissions and that he projects and calculates future emissions limits to stay under the 1,800 SO₂ limit Mississippi Lime Company has set to make sure the limit is not exceeded. The facility has products for use in flue gas desulfurization. In this case, the hydrate product is used to help keep actual emissions within the facility-wide annual limit. The facility uses a combination of stack test data and continuous monitoring of parametric data to insure compliance. For the six kilns listed below, wet scrubbers are employed as control devices and the pressure drop and scrubber flow rate are two of the parameters being kept. The facility also keeps records of stone feed and lime produced for each of these six kilns. The fuel is a mixture of coal and petroleum coke and the fuel with the higher amount of sulfur is stack tested. The facility also stack tests with the hydrate or SO₂ absorbent in use as a control device and without the absorbent.

I telephoned the Concerned Party (CP) on March 2, 2022, and I met the CP in person on March 10, 2022. During the site meeting the date of March 1, 2022, was of specific concern to the CP and I requested information about kiln operation for that day. Here is Mr. Kennedy's e-mailed response:

MRK#5 – Kiln operated all day on 3/1/22

MRK#6 – Kiln operated all day on 3/1/22

MRK#7 – Kiln operated all day on 3/1/22

MRK#8 – Kiln was offline for approximately 7 hours on 3/1/22 for routine scrubber cleaning and maintenance

MRK#9 – Kiln operated all day on 3/1/22

MRK#10 – Kiln operated all day on 3/1/22

The 2,000 tons of sulfur dioxide (SO₂) facility-wide limit was developed by US EPA to address concerns about potential violations of the National Ambient Air Quality Standard for SO₂ (see air Operating Permit OP2013-035A Statement of Basis pages 19-23 for additional information) the specific rule citation is Title 40 Code of Federal Regulations Part 51 Subpart BB, Data Requirements For Characterizing Air Quality For Primary SO₂ NAAQS. It is expected that compliance with this annual limit of 2,000 tons of SO₂ will translate to compliance with the National Ambient Air Quality Standard.

Concern No. 49199 **Concern Info** SP:431

CP states they live 200 yards behing TG building 3 and the chemical smelling comeing form the business is very strong. CP states this has been happening for 2 to 3 months. CP states the smell is chemical/mildew/moldy. CP states if the wind is comeing from the west that they are the first house it will hit and its very very bad.

Comments This environmental concern was conducted from 11:24 a.m. to 12:42 p.m. on March 3, 2022. At the time of this investigation, the weather was sunny and the temperatures ranged from 53 degrees Fahrenheit to 57 degrees Fahrenheit. At the start of the investigation the wind was from the Northeast at 12 miles per hour. When the investigation concluded the wind was from the North/Northeast at 11 miles per hour. I began the investigation by driving from Highway 51 to Highway 61 (11:30 a.m.) to 900 PCR to State Route V to State Route AC to Highway 51 and back to Highway 51 then to Highway 61. I drove along Highway 61 next toward Atlas Molded Products and Industrial Drive (11:42 a.m.). From Industrial Drive, I drove to Highway 51 to North Main Street to West Wichern Road to Industrial Drive (11:48 a.m.) to Highway 51 (11:50 a.m.) to Toohey Drive (11:52 a.m.). I turned around on Toohey Drive and then I drove back on to Highway 51. I drove on Highway 51 then turned on State Route AC from Highway 51 and I stopped off at James M. Eddle Welcome Center. Then I drove back on to State Route AC to State Route V to PCR 900 to Highway 61 (12:00 p.m.). From Highway 61 I turned on to Walters Lane drove to Corporation Drive (12:04 p.m.). I drove up Corporation Drive and turned around and returned to Walters Lane and drove back to Highway 61. Once on Highway 61 I drove to Highway 51 through the Industrial Park to North Main Street (12:10 p.m.) to West Wichern Road (12:12 p.m.) and then to Industrial Drive. From Industrial Drive I drove to Highway 61 (12:16 p.m.) and I turned on to Highway 51 (12:17 p.m.) I drove back through the Industrial Park to State Route AC (12:20 p.m.) and I drove on State Route AC to James M. Eddleman Welcome Center (12:23 p.m.). I drove back on to State Route AC to North Main Street (12:26 p.m.) to West Wichern Road (12:29 p.m.) to Industrial Drive (12:30 p.m.) to Highway 61 to Highway 51 and back to State Route AC (12:36 p.m.). I drove along State Route AC to James M. Eddleman Welcome Center (12:39 p.m. to 12:42 p.m.). Observations were ended at 12:42 p.m. All odors were faint and observed only when very close to the involved sources. Odors noted included tire exhaust odors, chemical odors and volatile organic compound odors.

I telephoned Dylan Carpenter on March 11, 2022. Mr. Carpenter said that he was not aware of any malfunction or other operational condition that would contribute to odors from TG Missouri Corporation.

He also stated that he is working with the paints department at TG Missouri to try and figure out if there has been a chemistry or mechanical system change that has affected things at TG Missouri Corporation.

Concern No. 48705 **Concern Info** SP:538

They use resin pellets for the manufacture of plastic bags and they get their resin from 1-3 rail cars. Every time they transfer they spill resin. Sometimes it is a little and sometimes it is a lot. They usually just cover it with more rocks around the railcars and do minimal to zero cleanup. They also empty the floor scrubber machine in a drain beside the building by the dumpster that drains resin plastic and cleaner waste across the street into the ground. The converting room uses "smoke eaters" to filter the smoke from burning plastic from the air but the department just fills with smoke.

Comments On March 1, 2022, I telephoned Jeremiah Bryant, Plant Engineer with Manchester Packaging Company. We discussed that Manchester Packaging extrudes plastic shopping bags and other products from resin beads. The bags are extruded into a long tubular thin plastic film. This material is cut and sealed using a hot knife that is operated at 800 degrees Fahrenheit. The cutting creates the dimensions of the bag and the sealing creates the sides and bottom of the shopping bags. This facility does not burn plastic as part of its process. The hot knife does melt the plastic to create the seals, however. The converting room is an area inside the building. In spite of the "smoke eater" name the building does not normally fill with smoke. The smoke eater units have filters and bags that are installed inside them. Mr. Bryant did state that during COVID-19 the filters and bags have been very difficult to obtain but they have a member of their staff who monitors and changes the bags and filters as needed. It now takes 16-20 weeks to receive the filters and bags once the order is placed. Mr. Bryant e-mailed photographs of the filter material and the bags that were in storage on site. Mr. Bryant also sent a photograph showing the smoke eaters mounted from on the ceiling inside the building. The building is kept under negative pressure in the converter room due to the filtration. Mr. Bryant stated that the standard operating procedure when resin pellets are spilled is to sweep them up and to double-bag them so that, the small light resin pellets do not fall out of the garbage truck when it picks up the facility's trash. He stated that spills do not frequently occur because the pneumatic system used to unload the railcars is designed to operate without leaks.

On March 4th, Air/Land Section Chief Josh Wilkerson visited the site and met with Jeremiah Bryant. Mr. Bryant provided a tour of facility operations. During the investigation, no concerns were identified as reported in the complaint. Information as listed above during the phone discussion was provided from Mr. Bryant. No visible solid waste concerns regarding pellets were identified. The use of two separate screens to eliminate pellet loss from containment are utilized, and no visible pellet piles were identified at the transfer point from the railway.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments I arrived at Carter's Post Mill around 3:00 PM. I went to the office and met with a Mr. Shayne Carter. I gave Mr. Carter my business card and explained him that I was investigating an environmental concern related to the open burning of wood waste on his property. I explained that a nearby resident was concerned about smoke from the open burning coming into his house and causing discomfort/breathing problems. I asked Mr. Carter where the burn pile was and he kindly showed me. The burn pile was actively smoking while I was there and it was located at the western-most side of Mr. Carter's property very close to a nearby residence. Mr. Carter informed me that he had always burned in this location of the property for some 20 years and that the nearby residence was constructed after he began his wood processing operations. Regardless, I informed Mr. Carter that there is a minimum distance requirement for open burning of 200 yards from the nearest owned structure not owned by the party responsible for the burning. Before traveling to Carter's Post Mill, I used Google Earth to map out, as best as I could, a radius of 200 yards from Carter's Post Mill that showed the most viable spot to burn in order to remain in compliance with the open burning requirements. I asked Mr. Carter that he pull his burn pile up closer to the center of the property to be in compliance with the 200 yard minimum distance requirement. Mr. Carter obliged and said that he would start burning nearer the center of the property. Mr. Carter was unable to tell me how many board feet he produced per day, but stated that he has a 2.5 cubic yard dumping hopper that he usually loads to take to the burn pile. He takes roughly 2 to 3 loads in a day. Even leaning on the high side of those numbers, Mr. Carter would only be burning roughly 37.5 cubic yards per week in a 5-day work week. This number is well below the 80 cubic yards threshold that would require an Air Curtain Incinerator be used. I gave Mr. Carter some fact sheets/publications related to open burning and encouraged him to contact me if he had any questions or concerns.								
The fact sheets/publications I gave Mr. Carter were: 10 Code of State Regulations 10-6.045 Open Burning Requirements Facts on Open Burning Under Missouri Regulations - PUB2047								
The burn pile at Carter's Post Mill was definitely within 200 yards of the CP's home. Mr. Carter stated that he would move the burn pile back toward the center of the property in order to be in compliance with the 200 yards minimum distance requirement. Given the numbers that Mr. Carter gave me on the amount of wood waste he burns in a week, it is not required that Carter's Post Mill get and use an Air Curtain Incinerator. I left some fact sheets/publications with Mr. Carter and encouraged him to contact me with any questions or concerns he may have. No further action at this time.

Concern No. 48686	Concern Info E-mail submitted to SLRO WPC: " My name is Larry Weygandt , I'm the home owner mentioned in your letter below , I'm a Retired Paramedic/ Firefighter ar also worked in the new home building business as a superintendent for Jackson new homes from the late 90's to 2009 , I r subdivisions in Wentzville and Troy MO. Also custom homes. Amberleigh subdivision backs up to my home and 4 acre's , Attach is your letter that addresses street cleaning , my concern is my family's health , as you will see in the attached pictures is the air my family and neighbors are forced to breath . You state water trucks are bad for the environment 1-Sediment getting to the streams through the sewers, there are sediment blocks in front of the sewers and what gets past that ends up in there retention ponds , what might get by is very minor. I've used water trucks for street cleaning and if you watch them in action the nozzles push most of the dirt into the yards. You also mention chlorine , I would have to say that small amount that is in our drinking water evaporates before it hits the streams , again mainly going to the retention ponds. There sprinklers system's dump water halfway across the streets daily which flow into the street sewers. The above pictures show your vacuum trucks in action one picture from last spring the first is recent this is daily at times , the dust tends to settle everywhere including the streets and is kicked up by trucks and cars, what is this dust made of 1- concrete dust from cutting the expansion joints very carcinogenic,2- unknown dirt partials ,this dust covers everything , before this project I would only need to vacuum my pool twice a week now it's every other day. Our patio tables and furnitu have to be cleaned daily. Please stop them from poisoning my Family and Neighbors!! Please acknowledge receipt of this letter . PS: when I filed a complaint last year with your office the gentleman that came out and saw the project said water trucks were the best option, his name was Lamar his phone number 314-402-3755 > Larry Weygandt > 636-614-8282

Comments I visited the site on 3/2/22. I was accompanied by Suzanne Lamb, Environmental Program Assistant. We drove around the development and noted that all storm drains had proper BMPs and there were several large retention ponds on the property. We did not notice an excessive amount of dirt or dust.

We then visited Larry's property and spoke with him. He showed us the dust that had accumulated on his deck after a short amount of time. It was a noticeable amount of dust. He said it was worst at night when they did the street sweeping, usually starting around 9 pm. It was hard to get a photo at night that showed how much dust there was. I told Larry that we would coordinate with water pollution and reach out to the developer once we had a plan.

I met with Spencer Gould, water section supervisor. We agreed that Lombardo could use water in the street sweeping process as long as it didn't get into the storm drains. We just didn't want them washing the dirt into the drains or off the property. I contacted Doug Nance with Lombardo homes, explained we received the concern, and explained what dust control measures were appropriate for air and water regulations. Doug said that he thought the street sweepers were using water, and that he would contact his crew to make sure this was done in the future.

The next day, we received a call from Larry, who told us that the dust was already being controlled better.

Concern No. 48916 **Concern Info** Forwarded from APCP asbestos unit. Anonymous concern regarding the demolition of Ruthie's Restaurant, located in Rosebud Missouri. No demolition notification was filed with DNR.

Comments I visited the site on March 7, 2022. I observed debris being sorted into piles with an excavator. The debris was largely wood and metal. Much of the wood appeared to be significantly burned from the fire. It appeared that most of the debris had already been removed from the property. Only the southern portion of the building had been demolished, the rest of the building was still intact. I took several photographs and waited for the excavator operator to meet me.

I spoke with Mike Miller, the excavator operator. I confirmed with Mike that the property was owned by Steve Lafrance with Lafrance Family Properties and got a contact number. Mike told me he was not with a demolition contractor, he was just helping out Steve. I asked if an asbestos inspection had been done on the building, and Mike said that he did not know. Mike told me that the section of the building that they demolished was a newer addition. The structure was mostly burned in the fire and what was left was some wood and metal. I explained that an asbestos inspection and notification is still required for all commercial demolitions, and that I would be contacting Steve to see if the inspection was performed. Mike told me that all of the debris was being transported by Swinger Sanitation to a landfill in Cuba (most likely Prairie Valley Sanitary Landfill).

I called Steve Lafrance and left a voicemail. We spoke the following morning, March 8, 2022. I explained the purpose of my investigation and my findings at the site. Steve told me that he was unaware of the asbestos regulations and that he did not have an asbestos inspection performed. He told me that he believed they finished hauling all of the debris from the property yesterday. I explained the federal NESHAP asbestos regulations and that all commercial demolitions must be inspected by a licensed asbestos inspector, and a notification must be submitted to us at least 10 working days prior to the demolition start date. I explained that we would be sending a Letter of Warning to record that a violation had occurred, and that any future violations will likely lead to elevated enforcement action.

Concern No. 48600 **Concern Info** Caller believes that someone is trespassing on his property and conducting some type of mining (metals) along the creek bank. He also seen people with buckets and rubber boots sneak onto his property. He has called the Sheriff's Department, however without being caught in the act or photos they can't do much. Sheriff's Department referred him to us because of possible pollution. Caller has noticed a chemical smell. He states it smells like ether and rotten eggs. He has had 7 cattle die in the last year. Mostly affects old and young cattle. Cows are bloated. He has taken cow to state vet. Caller has tested/swabbed pools of water, manure and rocks and they tested positive for a surfactant. Which he believes is the reason for death of his cows.

Caller is also worried about a large amount of erosion along his property. He has a large gravel bar and hole forming on his land. He has contacted NRCS about the erosion and they advised him to contact us because it did not appear to be natural erosion.

There is also a poultry barn next door to the west and dust from the barns is leaving the site and depositing onto the caller's land.

Concern No. 48628 **Concern Info** CP reports neighbors hauled in used tires at roughly 8pm on 2/24/22, dumped the tires on a wood pile, and lit the tires on fire. As of roughly 3pm 2/25/22 the pile was still smoking. CP has COPD and smoke has caused breathing issues. CP reported that Morgan Co. Sheriff was onsite the evening of 2/24 but did not know what to charge the RP with. CP said they have video of burning tires and that RP threatened violence when CP told the RP that burning tires was not allowed.

Concern No. 48647 **Concern Info** Received via online EPA reporting page - Dumping and burning roofing materials such as rubber rain tar as well as siding that puts off black smoke and is normally done at night. As well as put in an active sink hole with help from a neighbor with use backhoe next to an old pig pen and a garden. Has his crew remove asbestos without any protection and loads it in to trailer take to the dump or puts in to fill in rut around the property all to save money, brown circle is the active sink hole. And one he has been cleaned up because a lady that said she was from the EPA or DNR had instructed him to clean it up or a \$10,000 a day fine for them to clean it up would happen. And nothing done about the air and water damage already done. I believe her to be a fake the pics where unable to upload but it's on Google maps.

Concern No. 48648 **Concern Info** Received via online EPA reporting - Chemicals being released into the air and polluting vehicles and ground around the facility for blocks. Smell is horrible and even ruining residential and commercial areas due to air quality. Many people have complained about it and seems to be just pushed away and swept under the rug while everyone in half the town breathes it in. It suffers from their lack of care for the city and it's people and all living things around it including water ways.

Concern No. 48658 **Concern Info** From email:

People living at the corner people living on the corner of neill rd and ash street,have hauled trailers full of trash this week. They have been doing this for years , I have complained before. Tonight they have a huge fire with several explosion. Toxic smell. I worry it will pollute our ground water and the quality of our air. I heard you have visited him before , but he has never stopped.They have dug several holes around their place. They fill and burn and then dig another. Looks like clean out house and bring debris here to burn. Probably charge to do this , with no regard for their neighbors!

Concern No. 48659 **Concern Info** Voicemail left on Friday March 4, 2022... no phone number left...

I live north of the IsoNova plant on P Hwy by Verona. They are stinking up the neighborhood again. When the weather was little colder it seemed like the smell went up and we didn't get much of it, but as quick as it warms up a little it becomes almost unbearable. I seems like there should be something they can do to control the smell a little better.
